

Formulary Tips for Practices

It's the Responsibility of the Practice to Ensure the Formulary List and Pharmacy Directory is Updated

Formulary Compliance

- Assign a staff member to perform formulary quality checks on a weekly basis.
- Open up a support ticket in a timely manner if your formulary fails to provide notification of covered or non-covered medications.
- Ensure dosage information is entered into the properly designated area and that your notes are consistent with dosage.

Work with your EHR Vendor to ensure:

- Your EHR has been updated to the latest version.
- Many EHR's offer training opportunities via their website take advantage of any training needed to advance compliance and comprehension.
- Your EHR is in compliance with the latest version (10.6) of National Council for Prescription Drug programs (NCPDP).

Stay Informed

- Request continual notifications from your EHR vendor to ensure the latest functionality.
